

IMPORTANT:

PLEASE COMPLETELY UNDERSTAND ALL USER INSTRUCTIONS AND SAFETY INFORMATION BEFORE USING THIS PRODUCT. AS WITH ANY HIGH TECH PRODUCT YOU WILL NEED TO ROUTINELY CHECK FOR LOOSE HARDWARE, CRACKS OR OTHER DAMAGE AND REPLACE ITEMS AS NECESSARY. DO NOT USE PRODUCT IF ANY OF THESE CONDITIONS EXIST.

TOOLS REQUIRED

- 2.5mm non-ball ended Hex Wrench
- Torque Wrench up to 10 in lbs (1.1 Nm)

HARDWARE

BOTTLE

M4 x 20mm
Flat Head Screw

Dolphin Breather Valve

BOTTLE INSTALL

- EASY INSTALL.** Tilt the bottle clockwise approximately 1/2 inch. Push rearwards, ensuring the rear tab of the cage slides into the rear bottle recess. Next ensure the rear cage screw head clicks into the long recess on the bottom of the bottle. The cage tab should now sit against the vertical surface inside the back of the bottle. **Figure (A)**
- DOLPHIN TAIL INSTALL.** Decide if you want to fold your straw or keep it upright. If you decide to keep it upright, set the **DOLPHIN TAIL** straw retainer and screw aside. In order to fold your straw you will need to use the **DOLPHIN TAIL** straw retainer. Using a 2.5 mm Hex Wrench and the supplied M4 screw, attach the **DOLPHIN TAIL** into the top of the bottle. Torque to 10 in lbs (1.1 Nm) maximum. **Figure (B)**
- STRAW INSTALL.** Determine which hole is best suited to you for ideal straw position. Install the plug in the other hole from the inside of the bottle. Start the plug at an angle and push up around the perimeter of the plug. Ensure the top of the plug is completely through the hole. For the straw to be vertical, tuck the end of the straw behind the groove in the bottom of the bottle. **Figure (C)** If you intend to fold the straw down then place the bottom of the straw in front of the bottle groove. After each ride, gradually trim the straw to your optimum length.
- LID INSTALL.** The split lid provides the fastest refilling but there may be some splashing over bumps. The solid lid will make the system completely leak-free when paired with the Dolphin Breather Valve at the front of the bottle. Choose whichever you prefer. The solid lid has a tether hole. put the straw through this hole to avoid losing the lid when refilling **Figure (D)**
- DOLPHIN BREATHER VALVE INSTALL.** The bottle comes with a breather valve to completely seal the **TORPEDO BOTTLE** from leaks. To install, place the pointed end of the valve into the hole and press it in until it is fully seated. Move the valve around as it is being pushed in, to help get the edges in place. The top of the valve should be completely flat against the bottle. **Figure (E)**

BOTTLE CARE

HAND WASH YOUR TORPEDO BOTTLE, STRAW, PLUG, BITE VALVE AND LID EVERY TIME YOU USE IT AND BEFORE INITIAL FIRST USE.

When cleaning by hand it is not necessary to remove the accessories.

1. Fill Torpedo Bottle with soapy water.
2. Use one hand to cover the holes on top of the bottle.
3. Shake bottle vigorously.
4. Rinse and repeat.

STRAW CARE

STRAW TUCKING: Squeeze the straw near the **DOLPHIN TAIL** while tucking under the **DOLPHIN TAIL** for a quick and easy tuck on the go.

VALVE: It is NOT necessary to bite the valve with your teeth. Hold the valve with your lips and gently press and suck, just like you would with a traditional straw. Biting the valve with your teeth may cut the silicone tip and cause leaking.

LONG-LASTING SYSTEM: To get the most life out of your system make sure that you store your straw upright and not tucked under the Dolphin Tail Straw Retainer to avoid any kinking

WARRANTY

TORPEDO BOTTLE - Limited 2 Year

All Other Parts - Limited 6 Month
